COUNTRY OF ORIGIN

AGIRA PLUS

As a high-performance recessed directional LED spotlight, AGIRA PLUS rounds off the portfolio – in that way concepts with different ceiling heights and area sizes can be easily implemented with one luminaire type. The spotlights can be turned through 355° and tilted in two directions through 30° in each case – which is ideal for targeted and flexible illumination of goods. AGIRA PLUS combines the advantages of a gimbal-mounted luminaire with those of a classic recessed spotlight. Optionally fitted with the ACTIVE LED module. This makes the precise adjustment of the light possible as regards intensity and colour temperature. Now wireless lighting management available for low-installation modernization.

The tilting artist has got the knack and hence adjusts effortlessly to every movement in the change of assortment. At the same time, the luminaire has a single axis and does not shadow any light on the mounting ring or swivel ring. AGIRA PLUS recessed luminaires are available with luminous flux packages of up to 7000 lumens and in all white light colours as well as special colour ranges - suited first class to the most varied demands made on the atmosphere and aura of a store and its range of goods.

The directing of light with AGIRA PLUS is really excellent – nothing can be more targeted. Assortments in the change from spring to summer, autumn, winter? It simply tilts and turns in keeping with them and at the same time remains uncomplicated in handling thanks to the particular insensitivity to dirt. On request, available with an additional glass cover.
