## MANUFACTURER

# oktalite

## COUNTRY OF ORIGIN

## LENTY TRACK

LENTY TRACK excels with a light appearance that highlights goods and surfaces more pointedly than ever before. Interior design arrangements and individual products alike – this discreet luminaire is a multi-talent in targeted illumination. The small trend spotlight featuring specially developed lens technology scores points with excellently focused light quality in the fashion sector, among others. Be it fashion or surfaces: its core light, which is brighter compared to reflector spotlights, makes target objects stand out more vividly and sharply from their surroundings, enabling new lighting concepts. The luminaire is equipped with a CRI above 90 in all light colours and provides intense highlights at small lumen packages.

**Its strength lies in a small design combined with a concentrated beam characteristic. LENTY TRACK guides light directly to its destination with little scattering loss. This increases observer attention. Tables, exhibits, store windows: the lens spotlight establishes attractive islands of light that are clearly delineated in the room and generate suspense. LENTY TRACK is a complete track luminaire, making it an excellent long-term lighting solution.**

**Thanks to its maximum wattage in a minimal format, the lens spotlight is also recommendable for smaller shops with rather low ceiling heights such as acousticians, opticians and jewellers. In addition to retail applications, LENTY TRACK is also ideal for use in areas such as offices and restaurants. Available in black or white, this light artist is also ideal as a combination partner with downlights such as SONNOS from the TRILUX portfolio.**
