## S-LINE STANDARD

The PROLED aluminium profiles are the perfect addition to the PROLED FLEX STRIPS. The FLEX STRIPS can be glued into the profile. The aluminum profiles are in anodized aluminium or white RAL 9016 available. The profile can simply be sawn to any required length or ordered in the required custom length. Different versions of Aluminium profiles and different shapes of plastic covers are available. In addition we offer a wide range of accessories. S-LINE LOW (low profile) Two different shapes of high quality plastic covers are available: flat and round. Each of the two shapes are available in crystal clear, frost (semitransparent) and milky frost (opal). The flat cover (FLAT) is also supplied in black (translucent effect). The flat cover (FLAT) is also as a walkable and break-proof version in crystal clear, frost and milky frost (opal) available. The LENS COVER 60° provides a concentration of light rays and therefore a narrower beam angle. Depending on the distance between FLEX STRIP and LENS COVER the max. beam angle is 60°.
